Experience the magic of Leo Fender's lasting innovations in a surprisingly affordable instrument.

Exclusive G&L Tribute Series Features

Magnetic Field Design™ pickups—for guitars and basses were designed by Leo Fender* at G&L. These pickups have a higher output with less noise than traditional Alnico magnet pickups.

The tone of 'MFD' single coil pickups is warmer and slightly darker than standard Alnico magnet single coils. Each pole piece is adjustable for perfect volume balance between strings.

Dual-Fulcrum™ Vibrato—Designed by Leo Fender at G&L, the Dual-Fulcrum system is a simple, elegant design with silky smooth 'feel' bending both up and down. The tuning stability is exceptional and string breakage is kept to a minimum due to the innovative shape of the bridge saddles.

Saddle-Lock™ bridge—Designed by Leo Fender at G&L, a set screw at the side of the bridge compresses the saddles together. The saddles now resonate in unison with the bridge plate, resulting in more focused attack and improved sustain. A foot on the underside of the bridge fits into a rout in the body, pressing against the end grain of the body wood for maximum sustain.

P.T.B.™ Passive Treble and Bass tone controls for guitars—These controls are dramatically more effective than standard 'volume/tone/tone' setups. Treble and bass frequencies can be cut separately, and are effective on all pickups unlike traditional arrangements.

Tri-Tone™ Active Bass Circuitry—Treble and bass can be cut or boosted, a Series/Parallel switch determines signal route through the humbuckers, and a 3-position mini-toggle for preamp off/on/on with High EQ boost. Incredible sonic versatility for any playing style from slap/funk, smooth jazz to power packed rock.

2 Year Limited Warranty—Every Tribute instrument is covered by a 2 year limited warranty to the original owner (non-transferable).
